PRESENT WEATHER

Present Weather

Present Weather is a two digit code that describes the weather occurring at the time of observation, or in some cases that has occurred during the last hour. There are 100 code figures for describing present weather, from 00 to 99, generally the higher the code the worse the weather.

The codes are banded into six different categories:

- 01 19 Miscellaneous Phenomena
- 20 29 Phenomena Ceased During the Preceding Hour
- 30 39 Sand or Dust Storms
- 40 49 Fog or Ice Fog
- 50 79 Precipitation from Stratiform Clouds
- 80 99 Precipitation from Stratiform Clouds Only
