Lowest Minimum	-	5.5 °C (41.9°F) on 12th
Lowest Grass	-	1.1 °C (33.98° F) on 13th

**SUNSHINE**

June 2011	-	223 hours on 24 days
June 2010	-	311.7 hours on 29 days

Maximum sunshine in 24 hours - 14 hours on 2nd

**SUMMARY for June 2011**

The month began on a fine, warm note, but the weather gradually became more unsettled, with showers and some longer spells of rain. These eased the very dry conditions across parts of eastern England. Temperatures overall were close to the 1971-2000 average, although somewhat above in East Anglia and other eastern counties of England and somewhat below in Northern Ireland and western Scotland. It was the coolest June across the UK since 2001. The monthly rainfall pattern reflects the showery nature of the month. Sunshine totals overall were close to normal.

In Bognor Regis the heaviest fall of rain followed a very dry spell and the total for the month of 58.6 mm was higher than the average of 50.18 mm. Another heavy downpour occurred on 18<sup>th</sup> and there was a further heavy downpour towards the end of the month. Despite this the sunshine recorded was above the seasonal average of 231.61 mm. The mean maximum temperature of 18.7 deg. C. was close to the seasonal average of 18.04 deg. C. and the mean minimum of 10.5 deg. C. was lower than the seasonal average of 11.31 deg. C.
