PICTUREDROME CINEMA PROGRESS REPORT

Bognor Regis Town Mayor Surveys The Picturedrome Cinema Extension

Taking a break from his busy mayoral duties the outgoing Town Mayor, Cllr. Phil Woodall, took time out recently to see for himself the progress of the new cinema. Obviously not daunted by the height he accepted the offer to get a bird's-eye view of the extension from the contractor's scissor jack access platform. Obviously pleased with what he saw the Mayor said. "What an absolutely fabulous building, we are very lucky to have this fourth cinema screen in our Town and I can't wait until it opens in late summer! "

Progress Report

Since the last progress report the plaster boarding and suspended ceilings have progressed to the auditorium, with the ceilings and partitioning completed within the toilet and store rooms.

The mechanical heating and cooling installation to the auditorium has progressed as far as possible prior to testing.

The auditorium stepped-seating platform has been constructed and the structural alterations have been carried out in the 1st floor area that will form the escape route from screen 2.

The internal door linings have been installed.

Some external doors have been installed and the rain screen cladding installation is all but complete.

Next and Final Steps

Final building work will include completing ceilings and partitions, removing scaffold and commencing external works including paving and installation of bike racks.

Prior to final completion, a commissioning period of two weeks will be required to test all electrical equipment and apparatus prior to a final completion check by the building control department.

Meanwhile the cinema tenant, Mr Adam Cunard, will be busy installing all the hi-tech cinema equipment and seating.

We are all hoping that the cinema will be fully opened in August 2018 but watch this space.

*Smart new
cladding to cinema
extension*

The contractors have taken great care to ensure the new extension respects the existing structures, blending the two with care and precision
